FOR INFORMATION

The thallus of *Laminaria Japonica* is processed for obtaining alginates, mannitol, fucoidan, iodine, etc.

Organically-bound iodine normalizes the function of the thyroid, prevents endemic goiter, tumors of the thyroid gland, and reduces the level of cholesterol.

Fucoidan and laminarin are biologically active polysaccharides, have antiviral immunomodulatory and anticancer properties, prevent the development of malignant tumors, normalize the level of cholesterol and triglycerides, repairs protective functions of the body, especially after intensive chemotherapy and radiotherapy.

SODIUM ALGINATES effectively cleanse the body from toxic substances, waste, heavy metals, radionuclides, increase the radioresistance of the organism, favor to the restoration of blood counts in long-term effects of ionizing radiation on the body, the healing of affected mucous of the stomach and intestines (gastritis, ulcers, colitis).

Mannitol helps to reduce blood sugar in Type 2 Diabetes.

Macro- and microelements, vitamins and other biologically active natural compounds normalize the function of the major organs and systems of the human body, promote hair growth and improve the structure of nails.

LAMINA FORTE

UNIQUE NATURAL BIOPRODUCT

LAMINARIA JAPONICA MICRONIZED

LAMINA FORTE

- effectively prevents iodine deficiency and an underactive thyroid gland;
- reduces risk of thyroid cancers and other cancers;
- reduces high cholesterol and sugar;

- promotes weight loss in case of overweight & obesity;
- normalizes metabolism;
- improves gastrointestinal tract functioning ;
- strengthens the immune and nervous systems;
- improves hair growth and nail structure;

- removes harmful substances and waste from the body (radionuclides, heavy metals, free radicals, toxins), as well as strontium and cadmium if one smokes;
- restores energy, power, fluid-and-electrolyte balance after strenuous work and chemotherapy.

LAMINA FORTE

- contains (in the form of organic compounds) essential amino acids, bio vitamins A, B1, B2, B3, B12, calcium, chrome, copper, iron, selenium, zinc, as well as a number of minerals, including important and essential iodine.
- is prescribed in dietary nutrition, in rehabilitation medicine for the preservation and enhancement of the functional reserves of organism and human health.

LAMINA FORTE is a multipurpose product ensuring a healthy and balanced nutrition for populations living in areas with unfavorable ecological situations, and is also employed in hazardous industries (oil refining industry, hot shop, nuclear power plants, mines, etc.).

In big cities the use of LAMINA FORTE facilitates detoxification of the body in connection to excessive saturation of the air with exhaust gases and other pollutants.

LAMINA FORTE

Is a 100% natural food bioproduct from wild brown seaweeds – *Laminaria Japonica*, which grows in the coastal waters of Sakhalin island and is collected by hand by professional divers.

MAIN DISTINCTIONS OF

LAMINA FORTE

It is a micronized dry powder, produced by a unique and innovative low-temperature technology. This allows to open the membrane of plant cells and thereby greatly increase the content of the biologically active substances in the resulting product, while also ensuring bioavailability (absorption) by the body up to 90 - 98%. In air drying and grinding the absorption is about 8 - 12%; while chemical (unsecured) processing it is usually 30 - 45%.

The high bioavailability in LAMINA FORTE is what separates this unique DIVIA PHARM product from other *Laminaria Japonica* products available in the world.
